1 About these instructions for use

Trade mark rights exist for this document; for further information, go to viega.com/legal.

1.1 Target groups

The information in this instruction manual is directed at the following groups of people:

- Heating and plumbing experts and trained personnel
- Drywall builders

Individuals without the abovementioned training or qualification are not permitted to mount, install and, if required, maintain this product. This restriction does not extend to possible operating instructions.

The installation of Viega products must take place in accordance with the general rules of engineering and the Viega instructions for use.

1.2 Labelling of notes

Warning and advisory texts are set aside from the remainder of the text and are labelled with the relevant pictographs.

DANGER!

This symbol warns of possible life-threatening injury.

WARNING!

This symbol warns of possible serious injury.

CAUTION!

This symbol warns of possible injury.

NOTICE!

This symbol warns of possible damage to property.

This symbol gives additional information and hints.

1.3 About this translated version

This instruction for use contains important information about the choice of product or system, assembly and commissioning as well as intended use and, if required, maintenance measures. The information about the products, their properties and application technology are based on the current standards in Europe (e.g. EN) and/or in Germany (e.g. DIN/DVGW).

Some passages in the text may refer to technical codes in Europe/Germany. These should serve as recommendations in the absence of corresponding national regulations. The relevant national laws, standards, regulations, directives and other technical provisions take priority over the German/European directives specified in this manual: The information herein is not binding for other countries and regions; as said above, they should be understood as a recommendation.

2 Product information

2.1 Standards and regulations

The following standards and regulations apply to Germany / Europe and are provided as a support feature.

Regulations from section: Fields of application / Mounting conditions

Scope / Notice	Regulations applicable in Germany
Suitable masonry walls	EN 1996-1-1
Suitable concrete walls	DIN 1045
Suitable stud frames	DIN 18183

2.2 Intended use

2.2.1 Areas of application

The Prevista Dry washbasin element is suitable for mounting on masonry wall constructions and stud frames pursuant to the regulations in section ↪ *Chapter 2.1 'Standards and regulations' on page 5* and can be used in a Prevista Dry Plus pre-wall construction.

The model is dimensioned for the installation of a water meter measuring capsule ISTA, type istameter QN 1.5 m³/h and QN 2.5 m³/h.

2.3 Product description

2.3.1 Overview

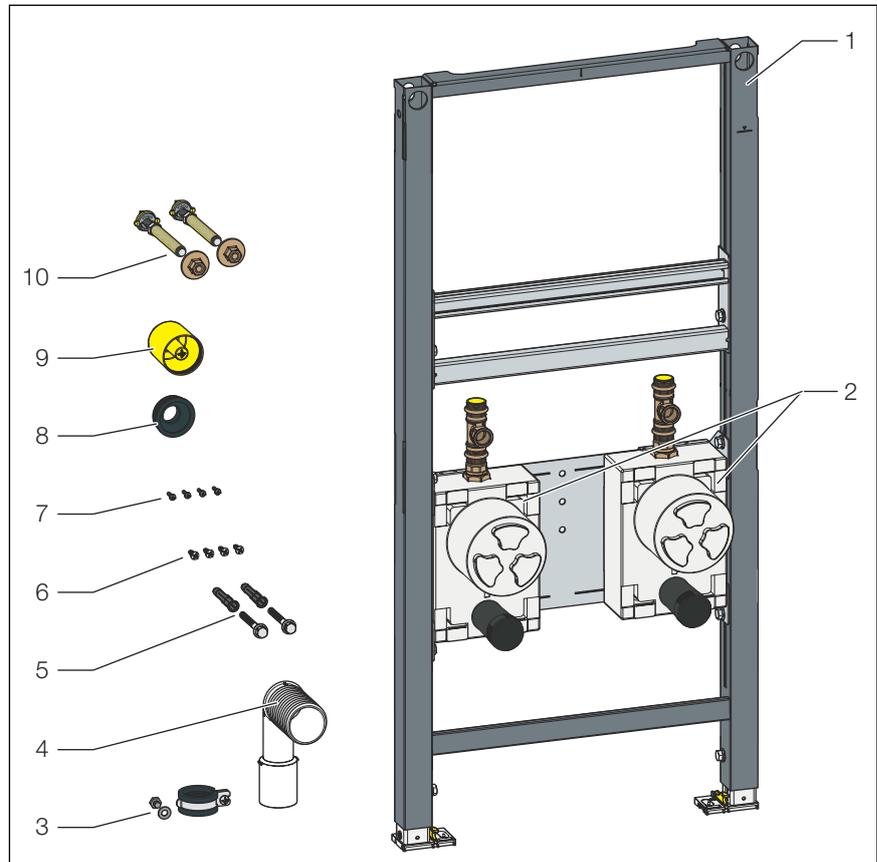

Fig. 1: Components and scope of delivery

- 1 Washbasin element
- 2 concealed water meter casing
- 3 Waste elbow fixing material
- 4 Waste elbow
- 5 Screws and dowels for fixing in the floor
- 6 Screws for fixing in stud frame
- 7 Screws for fixing the concealed water meter casing in place
- 8 Flushing pipe connector
- 9 Protective plug
- 10 Threaded rods for fixing sanitary objects

2.3.2 Compatible components

The washbasin element is compatible with all common washbasin ceramics, even with larger projection (barrier-free).

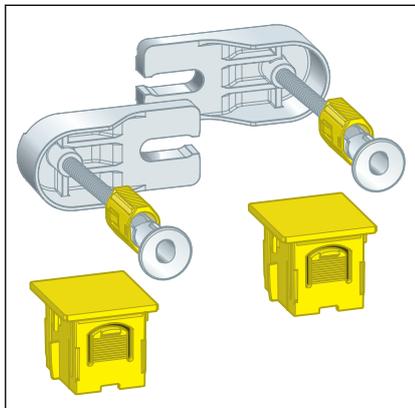

2.3.3 Technical data

Drain elbow (outlet side)	DN 40 / 50
Flushing pipe connector	DN 50 / 30
Hole diameter for fixing in timber stud frame	11 mm
Construction height	1120 mm
concealed water meter casing	EAS type ISTA with G2KOAX thread for the installation of water meter measuring capsule ISTA type istameter QN 1.5 m ³ /h and QN 2.5 m ³ /h

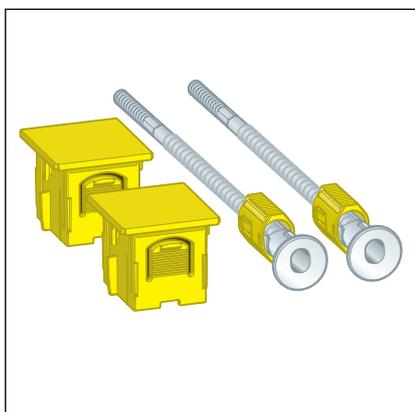

2.4 Accessories

For mounting, Viega recommends to use the Prevista Dry fixing set.

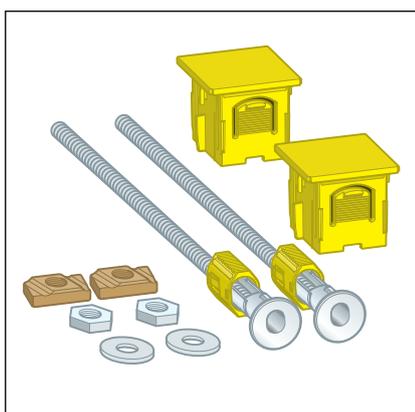

Prevista Dry fixing set model 8570.66 for fixing the Prevista Dry elements in single / line mounting, single mounting directly onto the installation body or corner mounting on masonry or steel stud frame.

Prevista Dry fixing set model 8573 for single mounting of Prevista Dry elements to the solid wall.

Prevista Dry Plus fixing set model 8570.49 for single mounting of the Prevista Dry elements in Prevista Dry Plus.

3 Handling

3.1 Assembly information

3.1.1 Mounting conditions

Suitable walls

- Masonry walls
- Concrete walls
- Metal stud frames
- Prevista Dry Plus pre-wall constructions

The wall constructions must comply with the regulations in section [↪ Chapter 2.1 'Standards and regulations' on page 5](#).

The element may only be mounted on even wall surfaces.

Construction height

With the construction height, the marked height of the upper edge of the finished floor must be observed.

3.1.2 Installation dimensions

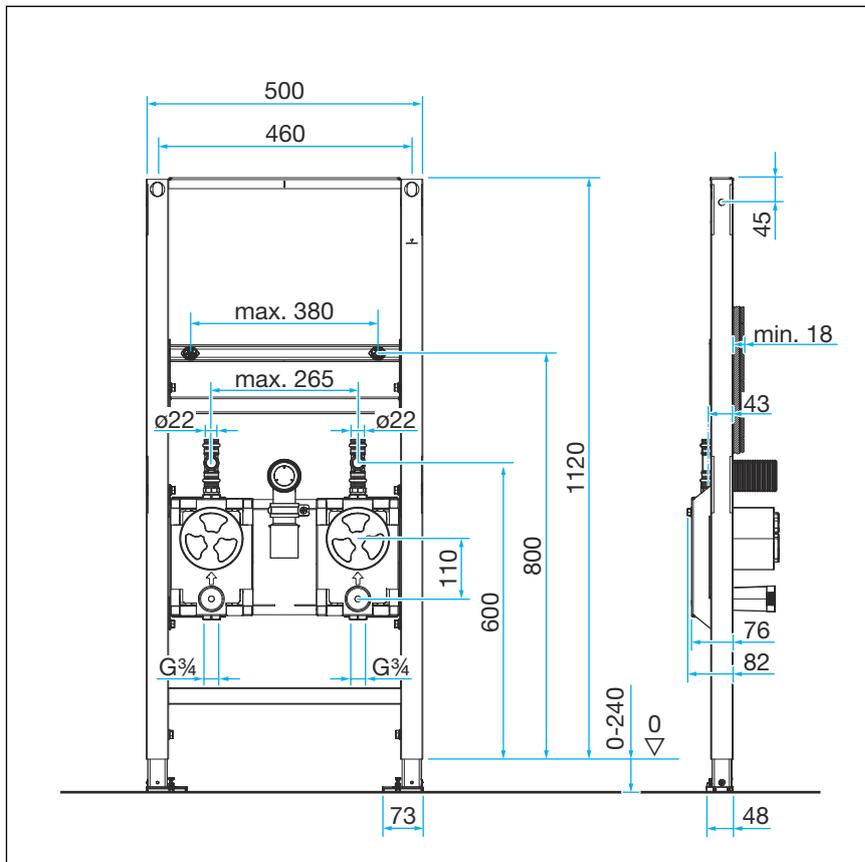

Fig. 2: Dimensions

3.2 Assembly

3.2.1 Mounting the element

Mounting to a masonry wall

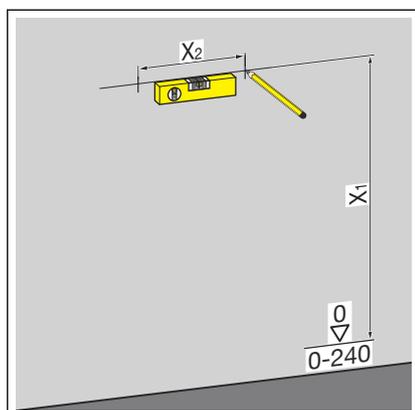

Masonry and concrete walls

When mounting multiple elements with an interval of > 500 mm, Viega recommends using a Prevista Dry support bracket (model 8570.48). Observe the instructions for use of the support bracket when mounting.

Mounting to a masonry or concrete wall

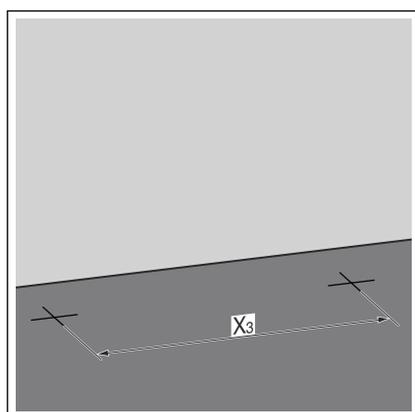

For mounting, Viega recommends to use a Prevista Dry fixing set.

- Determine and mark the fixing points.

- X1: 1100 mm
- X2: Depending on the fixing set used

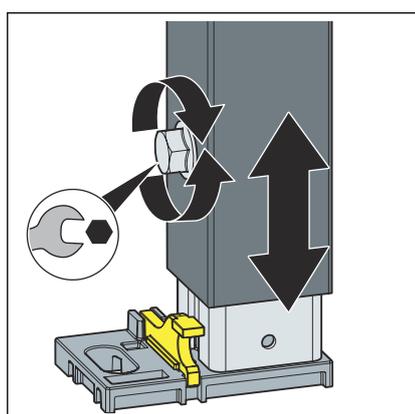

- Determine and mark the fixing points on the floor.

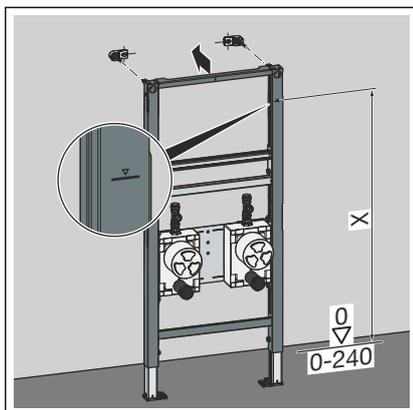

- X3: 375 mm

- Drill the holes.
- Insert the dowels.

INFO! Mount the Prevista Dry fixing set pursuant to the instructions for use for the fixing set.

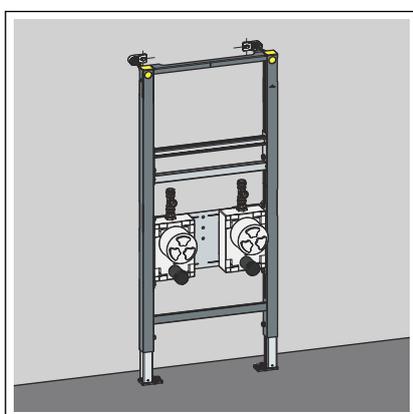

- Loosen the feet of the element using a fork spanner.

➤ Adjust the construction height of the element in accordance with the on-site marking of the upper edge of the finished floor.

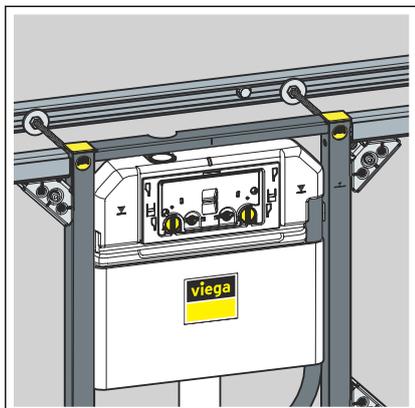

■ X: 1000 mm

➤ Tighten the feet of the element using a fork spanner.

◇ The element is attached to the wall.

Mounting in Prevista Dry Plus

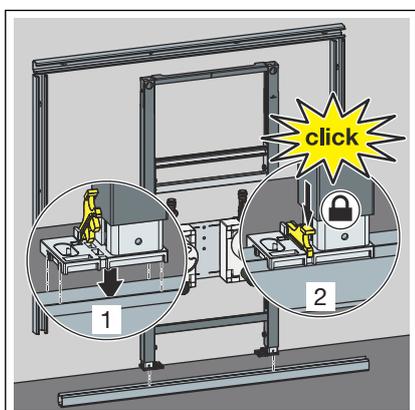

NOTICE!

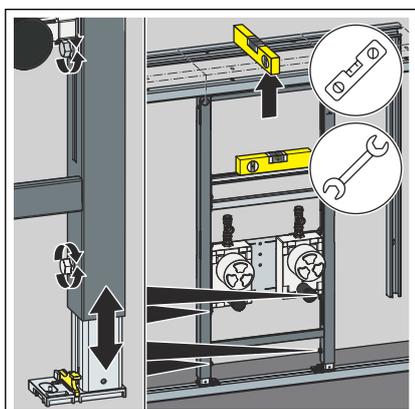

When mounting without a continuous rail above the element, the Prevista Dry Plus fixing set (model 8570.49) must also be used. See example with WC element model 8521.

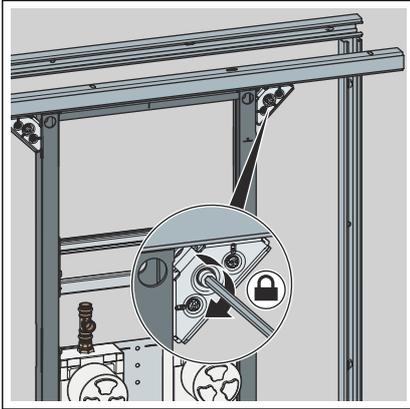

Mount the Prevista Dry Plus pre-wall construction pursuant to the instructions for use of the Prevista Dry Plus system.

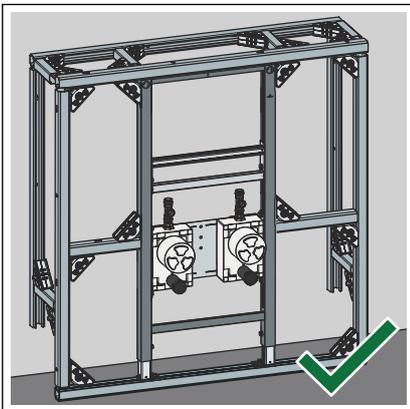

- Position the element on the floor rail.
- Fix the feet on the floor rail using the clips.

- Set the height of the element by means of the feet.

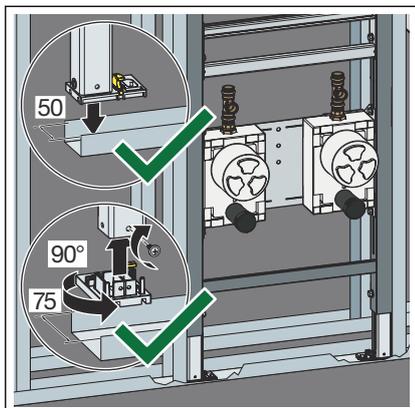

■ Fix the element with the Prevista Dry Plus rail connectors.

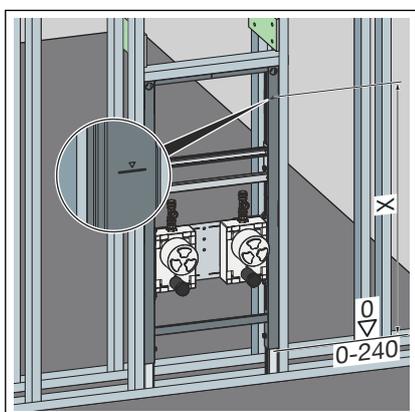

□ The element is fixed in the Prevista Dry Plus pre-wall construction.

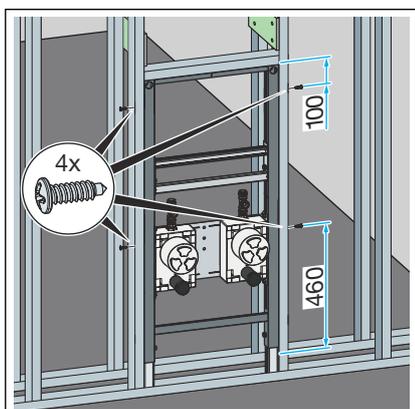

Mounting in steel stud frame

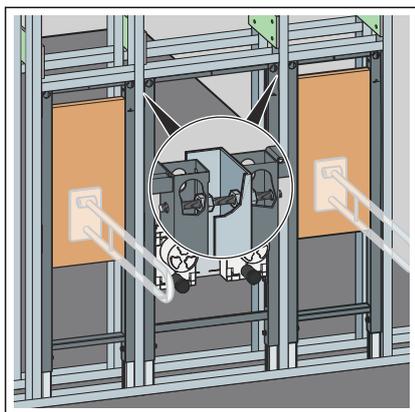

- Position the element on the floor rail.
- If necessary, adjust the foot depth from 50 mm (pre-mounted) to 75 mm.
- Pull the foot out and turn by 90°.
- Fix the feet.

- Adjust the construction height of the element in accordance with the on-site marking of the upper edge of the finished floor.
 - X: 1000 mm

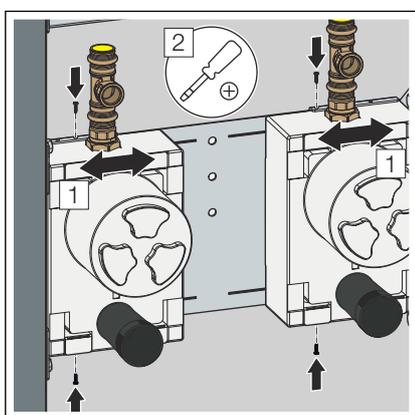

- Attach the element to the stud frame using the screws supplied.

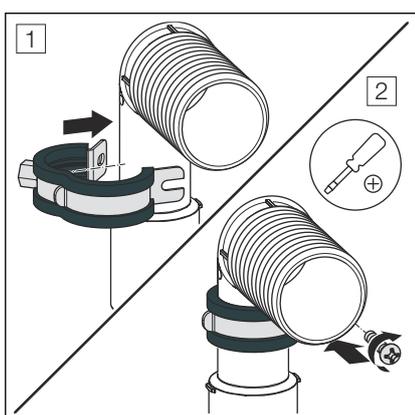

- If applicable, connect further elements to the element via the stud frame.

3.2.2 Setting up and cladding the element

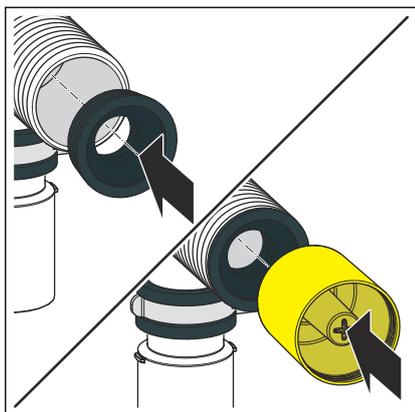

Set up the element

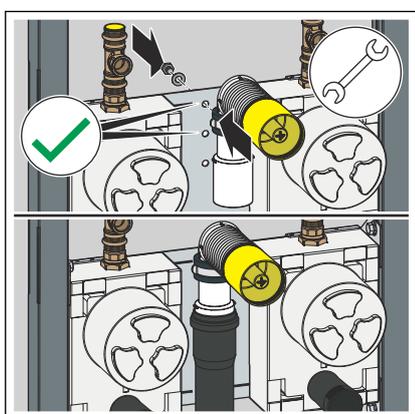

- Set the concealed water meter casing to the desired clearance and fix it to the support element using the four screws.

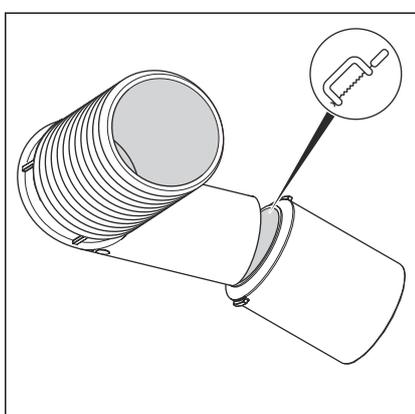

- Clip the waste elbow into the pipe clamp.

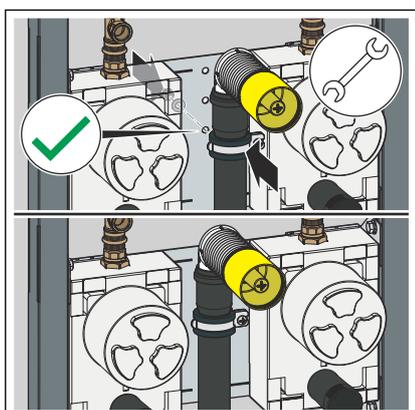

► Fit the flushing pipe connector and the protective plug.

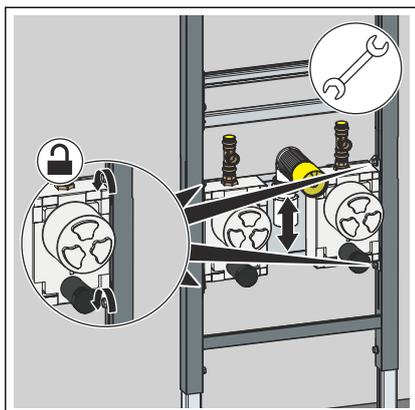

► Option 1: DN50 in upper and middle position
Fasten the waste elbow using the bracket.

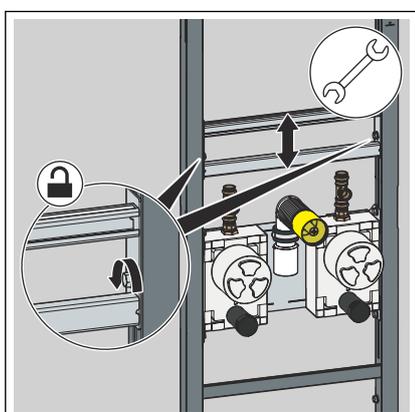

► Option 2: DN40 in lower position
Shorten the waste elbow to DN40.

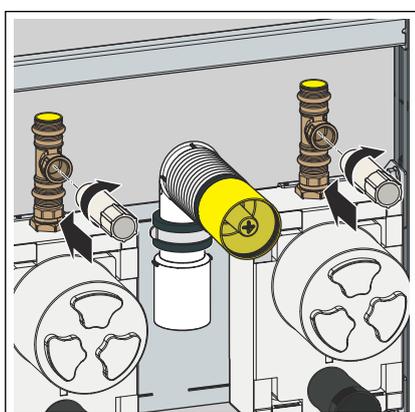

► Fasten the DN40 drainpipe using the bracket.

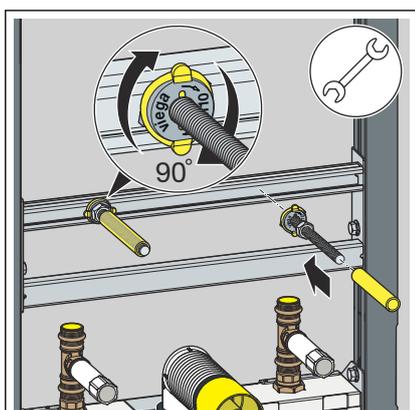

- Set the entire water meter unit to the desired height.
Observe the instructions of the sanitary objects manufacturer.

- Set the crossbeam for the WB ceramic to the desired height.

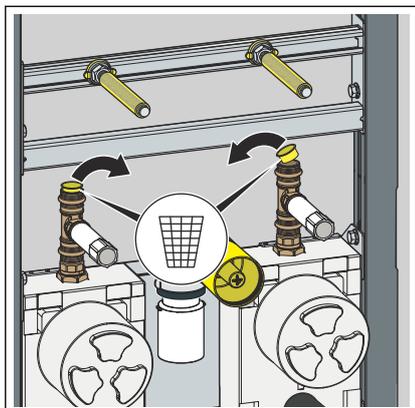

- Fit the pressure test plug.

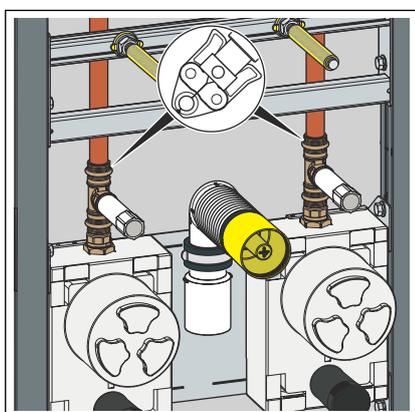

- Tighten the nuts of the threaded rods with a fork spanner.
- Place the protective caps on the threaded rods.

Establish the water connections

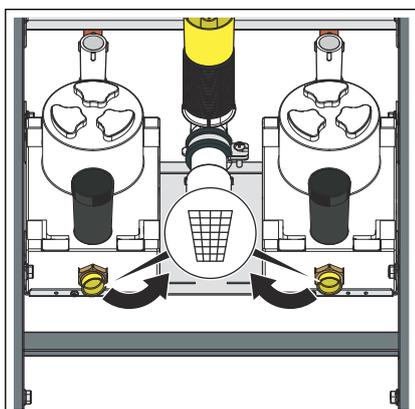

- Remove the plugs from the press ends.

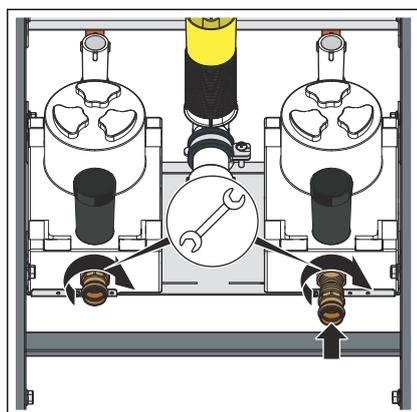

NOTICE! Do not use pointed objects to remove the plugs as this may damage the sealing elements.

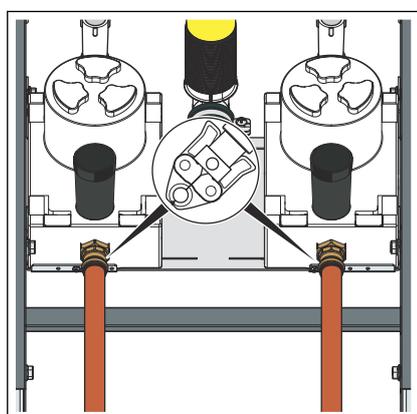

- Press the water pipeline on the outlet side. Make sure that the piping is laid without tension.

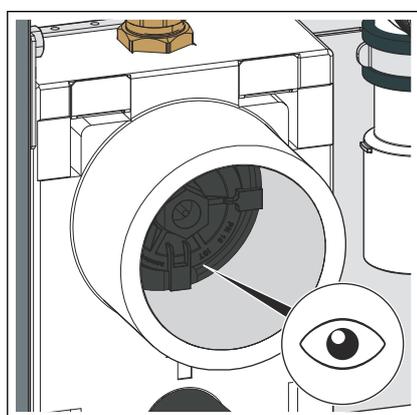

- Remove the plugs from the threaded connections.

- Screw in the press connectors on the water intake side. Counter with a fork spanner.

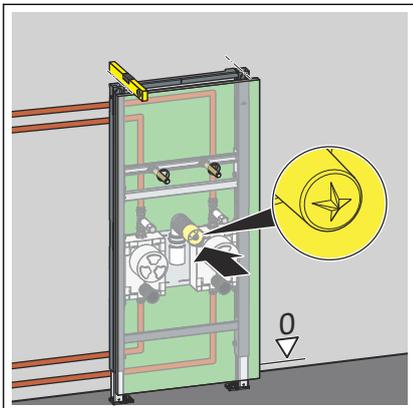

- Press the water pipeline on the inlet side.

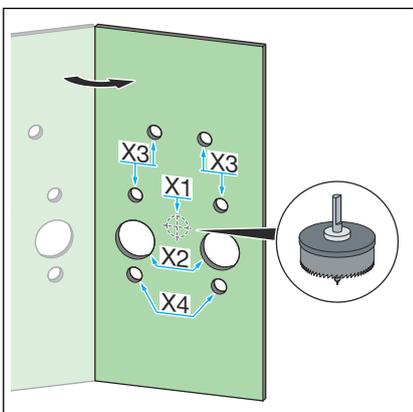

NOTICE! The black plastic blind cover is not intended for constant operation. This should only remain in place until the water meter capsule has been mounted. If a water meter is not being mounted, the blind cover must be replaced with one that is suitable for constant operation.

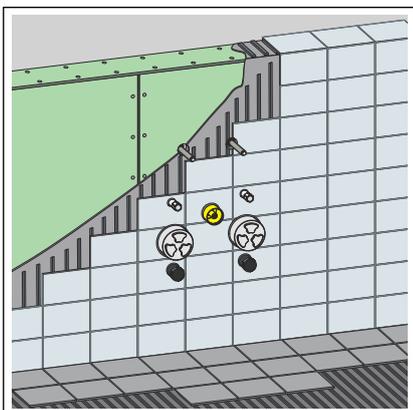

Clad the element

- Impress a suitable plasterboard cladding panel at the plug using gentle pressure.

- Cut out the recesses for the plug and the threaded rods.
 - X1: min. 58 mm
 - X2: min. 115 mm
 - X3: min. 44 mm
 - X4: min. 48 mm

- Clad the element with suitable plasterboard cladding panels.

3.3 Disposal

Separate the product and packaging materials (e. g. paper, metal, plastic or non-ferrous metals) and dispose of in accordance with valid national legal requirements.
